

## ABOUT US

“ A pioneering force in the realm of mineral exploration and mining services. Founded in the heart of Muscat, Oman, with a supportive presence in Riyadh, Saudi Arabia, our company stands as a beacon of expertise and innovation in the mining industry. Mining Experts SPC was established by a cadre of seasoned engineers, each boasting over 20 years of hands-on experience in exploration and mining in Oman and Saudi Arabia. This diverse team's expertise spans a multitude of precious & base metals and industrial minerals, underpinning our reputation as industry leaders.

“ We are dedicated to pushing the boundaries of mineral exploration. Our services encompass a comprehensive range of solutions tailored to the unique needs of each project. From initial planning and licensing to the advancement of mining projects, we are equipped to handle the intricate demands of the mining sector. Our team's involvement in several mega exploration and mining projects speaks volumes about our capability and commitment. These projects not only showcase our technical proficiency but also our ability to deliver results that align with our clients' visions and the industry's evolving demands.

## OUR VISION

“ Looking ahead, Mining Experts SPC envisions a future where our expertise continues to facilitate groundbreaking discoveries and advancements in the mining sector. We aim to remain at the forefront of innovation, setting new standards for excellence and sustainability in mineral exploration.

## OUR MISSION

“ We are committed to leading the way in responsible and innovative mineral exploration. Leveraging our deep expertise and extensive experience, our mission is to develop and implement advanced exploration strategies that not only uncover the wealth beneath our feet but do so with the utmost respect for our planet and its communities.

We strive to be pioneers in our field, constantly pushing the boundaries of technology and knowledge to ensure that our exploration and mining activities contribute positively to the gulf's sustainable development goals.

# CORE VALUES

## Sustainability

We are committed to sustainable mining practices that respect and preserve the environment while meeting the current needs of our industry. Our approach balances economic growth with ecological responsibility.

## Innovation

We continuously seek innovative methods and technologies to improve mineral exploration and mining processes. Our goal is to set new industry standards in efficiency and effectiveness.

## Integrity

We uphold the highest standards of professionalism and ethical behavior. Honesty and transparency guide our interactions with clients, partners, and communities.

## Safety

Ensuring the safety of our employees, contractors, and community members is paramount. We adhere to strict safety protocols and strive to create a zero-harm workplace.

## Expertise

Our team's extensive experience and deep knowledge form the backbone of our operations. We value continuous learning and professional development to maintain our leadership in the industry.

## Collaboration

We believe in the power of teamwork and partnerships. Collaborative efforts with clients, local communities, and industry peers are essential for shared success.

## Community Engagement

We are committed to making a positive impact in the communities where we operate. This involves open dialogue, community support initiatives, and contributing to local development.

## Respect for Diversity

We embrace and respect diverse perspectives and cultures. Our inclusive environment fosters innovation and enriches our company culture.

## Adaptability

In a rapidly changing industry, we remain flexible and responsive to new challenges and opportunities, ensuring our long-term resilience and sustainability.

## Quality Assurance

In a rapidly changing industry, we remain flexible and responsive to new challenges and opportunities, ensuring our long-term resilience and sustainability.

At Mining Experts SPC, we harmonize innovation, integrity, and sustainability to pioneer responsible advancements in the mining industry...

## SAFETY FIRST

### Zero-Harm Workplace

Our foremost priority is to maintain a safe working environment. We strive for zero harm through rigorous safety protocols and continuous safety training for all employees.

### Compliance with Regulations

We strictly adhere to all local and international safety regulations. Regular audits and reviews ensure our compliance is always up to date.

### Safety Innovations

We invest in the latest safety technologies and equipment to enhance the protection of our employees.

### Emergency Preparedness

We maintain robust emergency response plans and conduct regular drills to prepare our team for any potential hazards.

Health, Safety & Environment (HSE) is pivotal in every aspect of our operations. It's embedded through our employees and contractors, ensuring efficiency and effectiveness in fostering a secure, healthy workplace. Our commitment to HSE not only benefits our team and organization but extends its positive impact to society, embodying our belief that a safe, healthy workforce is fundamental to our collective well-being.

## ENVIRONMENTAL STEWARDSHIP

### Sustainable Practices

We are committed to sustainable mining practices that minimize environmental impact. This includes responsible resource extraction and waste management.

### Biodiversity Conservation

Our operations are conducted with utmost care to protect local biodiversity. We assess environmental impacts and implement measures to preserve natural habitats.

### Energy Efficiency

We prioritize energy-efficient processes and strive to reduce our carbon footprint through innovative solutions.

### Rehabilitation and Restoration

Post-exploration and mining, we engage in land rehabilitation and restoration activities to return the environment to its natural state, wherever feasible.

### Community Engagement

We work closely with local communities to understand and mitigate any environmental concerns. Our aim is to achieve harmony between our operations and the local environment.

### Continuous Improvement

We regularly review and improve our environmental policies, staying abreast of new research and best practices in environmental management.

“ We take pride in imbuing the essence of HSE amongst all its stakeholders in both letter and spirit and ensures it to be a %100 non-negotiable practice. As a result, We can proudly claim to have ZERO (0) LTIs (LOST TIME INJURIES) till date.

**HEALTH, SAFETY & ENVIRONMENT (HSE) IS NOT JUST A PRACTICE BUT A WAY OF LIFE !!!**

# SERVICES

## Exploration and Mining Business Establishment and Regulatory Compliance Services:

Customized guidance for choosing the optimal business structure, along with the meticulous preparation and submission of all vital documents required for both business and commercial registration purposes.

For international investment firms, our service encompasses the thorough preparation and submission of essential documentation to obtain the required investment licenses.

Additionally, we offer comprehensive support in initiating and activating all requisite government files and subscriptions to ensure operating in strict accordance with local regulations.

## Integrated Exploration & Mining Projects Facilitation and Licensing Services:

Thoughtful curation and nomination of metallic and industrial minerals projects designed to match the investor's requirements. Our specialized team takes charge of preparing all necessary documentation and meeting requirements and initiates the submission process and diligently progress follow up with the concerned government departments, ensuring a smooth journey towards obtaining various types of mining licenses until successfully issued.

**This solution caters to a diverse range of customers, including:**

- Newly formed exploration and mining & quarrying enterprises in Saudi Arabia.
- Organizations seeking expansion into the exploration and mining sector.
- Manufacturing firms aim to streamline their supply chain by acquiring and running mines and quarries to internally produce their raw materials, leading to cost and quality efficiencies.

# SERVICES

## Industrial Minerals Projects - From Site Selection to Production Lines Development:

Comprehensive Industrial Minerals Project Management service seamlessly guides you through every phase of your project journey, starting with meticulous site selection and progressing to securing exploration and exploitation licenses following the implementation of necessary exploration programs and feasibility studies. We customize the project development to suit your unique requirements, providing expertise in quarry design, operations planning, and the establishment of production facilities, which includes crushing, grinding, screening, washing, and handling plants, all geared toward efficiently producing your required raw materials.

**Range of expertise:**

SILICA

QUARTZ

LIMESTONE

DOLOMITE

KAOLIN

## Integrated Exploration Management: Pioneering Precision in Mineral Discovery

Through collaboration with world-class consultants, exploration specialists, and state-of-the-art laboratories, we proudly offer comprehensive Exploration Management Services. Our expertise spans the entire spectrum of exploration, encompassing geological assessments, mineral prospecting, and resource evaluation. Leveraging the collective knowledge of our esteemed partners and our commitment to cutting-edge technology, we provide you with end-to-end solutions that include project planning, execution, and analysis. Whether you're embarking on a new exploration venture or seeking to optimize existing projects, our Exploration Management Services ensure meticulous planning, efficient operations, and the precise data you need to make informed decisions, all while adhering to the highest industry standards.

- Exploration planning, and project management
- Information collection and desk studies
- Remote Sensing
- Reconnaissance and Field Works
- Detailed geological mapping
- Petrographic Studies
- Geochemical Sampling Programs
- Geophysical Surveys
- Drilling and Sampling
- Metallurgical Studies Management
- Data Integration and Analysis
- Resource Assessment and Definition
- Studies and Reports

# SERVICES

## Comprehensive Mine Engineering: From Concept to Production

### Mining and Quarrying Services:

We take pride in our strategic partnerships with a network of highly skilled and advanced mining contractors. Through these collaborations, we offer comprehensive solutions for the precise operations of mines and quarries. Our services encompass every aspect of the mining and quarrying lifecycle, ensuring efficiency, safety, and optimal resource utilization. With a focus on innovation and professionalism, we deliver exceptional results.

### Mine Planning and Design:

Offering comprehensive mine planning and design services to optimize the extraction process and ensure maximum efficiency. Our experts collaborate closely with clients to create tailored mining plans that minimize environmental impact and maximize productivity.

### Mine Development and Operations:

From initial construction to full-scale mining operations, we provide end-to-end mine development and operation services. Our experienced network of workforces, coupled with our state-of-the-art equipment, ensures smooth operations and efficient resource extraction. By collaborating with multiple professional mining contractors and leveraging state-of-the-art equipment and expertise, we deliver turnkey solutions that empower our clients to thrive in the mining and quarrying industry. We are dedicated to driving success through innovation, precision, and a commitment to excellence.

# SERVICES

## Turnkey Crushing and Grinding Solutions for Industrial Minerals:

We specialize in providing turnkey solutions for crushing and grinding plants, leveraging partnerships with high-quality manufacturers. Our collaborative approach ensures that you receive top-grade crushers and grinding solutions, tailored to the specific needs of the mining and minerals processing industry.

 **Customized Plants Designs:** Our experienced engineers collaborate closely with clients to design custom crushing and grinding plants tailored to specific requirements. We optimize plant layouts, equipment selection, and process flows to maximize efficiency and productivity.

 **Equipment Procurement:** We handle the procurement of all necessary equipment, ensuring that you receive high-quality machinery that meets performance standards. Our extensive industry connections enable us to secure the best equipment at competitive prices.

 **Construction and Installation:** Our skilled construction teams and contractors manage the installation and commissioning of crushing and grinding plants. We adhere to rigorous safety standards and project timelines to minimize disruptions and ensure a seamless startup.

 **Process Optimization:** Post-installation, our experts focus on fine-tuning the plant's processes for maximum performance. We employ advanced control systems and automation to optimize efficiency, reduce energy consumption, and enhance product quality.

# SERVICES

## Turnkey Crushing and Grinding Solutions for Industrial Minerals:

 **Staff Training and Development:** We provide comprehensive training programs for your plant operators and maintenance teams, empowering them to operate and maintain the equipment effectively and safely.

 **Maintenance and Support:** We offer ongoing maintenance and support services to keep your crushing and grinding plant operating at peak performance. Our teams conduct regular inspections, preventive maintenance, and repairs as needed.

 **Performance Monitoring and Reporting:** We implement advanced monitoring systems to track plant performance in real-time. Regular performance reports provide insights into operational efficiency and areas for improvement. With our extensive network of high-quality manufacturers and a commitment to delivering turnkey solutions of the highest caliber, we empower mining and minerals processing operations to achieve their production goals efficiently and sustainably. Our collaborative approach ensures your crushing and grinding plant, equipped with top-grade machinery, operates smoothly and optimally.

## Customized Exploration Information Management Systems:

We offer state-of-the-art, customized information management systems tailored to streamline and optimize the process of exploration license applications, reporting, and field data management. Our systems are designed to provide seamless, efficient, and secure solutions, enabling clients to manage their exploration projects with unmatched precision and ease. From initial application to ongoing data collection and analysis, our platforms ensure that all aspects of your exploration project are meticulously organized and easily accessible. Leveraging advanced technology and our deep industry expertise, we deliver systems that not only meet but exceed the dynamic needs of modern mineral exploration. With Mining Experts SPC's information management solutions, clients are empowered to focus on their core operations, assured of reliable and effective management of their critical data.

# NETWORK OF EXPERTS

At Mining Experts SPC, we pride ourselves on our extensive network of highly skilled consultants, specialists, projects managers, suppliers and contractors, each bringing a wealth of experience and specialized knowledge to our operations. This diverse and talented group forms the backbone of our ability to offer unparalleled services to our clients. They are handpicked for their expertise in various aspects of mineral exploration and mining, ensuring that we provide not just solutions, but the best-in-class services tailored to meet the unique needs of each project. Our network's collaborative efforts enable us to tackle complex challenges, innovate solutions, and maintain our commitment to excellence and efficiency. With these partnerships, Mining Experts SPC stands as a versatile and capable leader in the industry, equipped to deliver superior results consistently to our esteemed clients.

# QUALITY POLICY

- ✔ **Customer Satisfaction:** We strive to understand and meet our customers' needs and expectations, delivering products and services that consistently exceed their requirements. We value feedback from our customers and continuously improve our processes to enhance their satisfaction.
- ✔ **Compliance:** We strictly adhere to all applicable laws, regulations, and industry standards governing mining and exploration activities. We prioritize environmental sustainability, health, and safety in all our operations, ensuring responsible and ethical practices.
- ✔ **Continuous Improvement:** We foster a culture of continuous improvement by regularly evaluating our processes, identifying areas for enhancement, and implementing appropriate corrective and preventive measures. We encourage our employees to contribute innovative ideas and actively participate in quality initiatives.
- ✔ **Training and Development:** We invest in training and development of our employees, providing them with the necessary skills and knowledge to perform their tasks effectively and safely. We promote a culture of competence and professionalism, encouraging our workforce to strive for excellence in their respective roles.
- ✔ **Collaboration and Partnerships:** We actively seek collaboration and partnerships with stakeholders, including local communities, government agencies, and industry peers. Through open and transparent communication, we aim to build trust, share knowledge, and collectively work towards sustainable and responsible mining and exploration practices.
- ✔ **Risk Management:** We proactively identify and manage risks associated with our operations, implementing robust measures to minimize their impact on quality, safety, and the environment. We regularly review and update our risk management strategies to ensure the highest level of protection for our employees, the communities we operate in, and the natural resources we extract.

“Our quality policy guides our decision-making processes, drives our commitment to excellence, and fosters a culture of accountability throughout our organization. By upholding these principles, we aim to be recognized as a leading mining and exploration services company, delivering superior value to our customers, while promoting social and environmental stewardship...”
